

# Teel Track™

## Advanced Asset Tracking and Remote Monitoring Solution

The Teel product line is designed for advanced asset tracking and remote monitoring, featuring enhanced functionality with full fleet management capabilities, robustness and ease of installation, suitable for a wide variety of asset management applications.

The Teel Track product line is available in two variants – a standalone version and a power version, which includes extended battery life and the ability to connect external sensors via two configurable GPIOs. Models are suitable for 2G, 3G (North America) and 3G (Europe) cellular communication technologies.

The capabilities provided by the Teel Track product line can greatly increase the productivity and bottom-line of enterprises. This is largely due to the improvement in the often difficult task of successfully tracking and remotely managing the location, usage profile and security aspects of transportation equipment such as trailers, containers, train wagons or any kind of valuable mobile and fixed assets, such as electricity generators,
